

Anime Interests

By: Jessica and Ellie

Date: Thursday 14 March 2019

Are you a fan of Anime? Today we wanted to study and assess the opinion of people who share the same interests, and how vast the growth of positive attitude of the seemingly 'strange' interest. We have divided the questions into 6 areas we believe might be a trigger to a future obsession, interviewing a range of ages beginning at 13 to 14 and also taking into consideration of adults with more advanced answers.

Anime has been an ongoing since 1917 and has grown in popularity. It spread largely in a particular country, Japan. The person that created the first anime is Oten Shimokawa, and his influence wildly spread, and encouraged other people to follow the concept of these comic style stories and fiction. An example of this is how it ranged widely in the 20th century.

In modern day, anime has evolved into different age varieties, genres and even online videogames. On average anime cost for 9 animated episode costs around 2 million dollars or 250 million yen in Japan. And the average manga artist can make half a million a year. People are becoming more advanced in the art of anime and the salaries are raising dramatically as more passionate viewers are purchasing the art and merchandise. Some described it as 'amazing' and some school teachers even suppress their love for the comic like stories.

However, Anime can also be hard to get a hold off, the books being reasonably costly. Some people have no idea on the existence of anime and some of the people we have interviewed didn't have a positive outlook. Others are indifference not wanting to get involved in the strange aspects of the foreign art.

In conclusion, according to our studies, 80% of the data we recorded knew the existence of Anime and had a positive view to explain their interpretations. Though the other 20% rather didn't know about anime or had a negative outlook on it. We believe that anime is a popular growing series and shouldn't be judged on the deceiving eyes. Overall, anime is a unique style of creativity and should be appreciated throughout the world.
