

Bullying In School

Names: Ella, JJ and Sofia

Date: Thursday 15 March 2018

Bullying is a problem in our school and we believe it should be addressed. One reason that people are bullied is not looking right and not wearing the newest brands of clothing. Another reason is that they don't hang out with the right people to be called 'cool'. Here are some interesting facts and information about bullying in schools. We asked 10 students 6 questions about bullying.

Why do people find bullying funny?

They do it to make themselves look big in front of their friends. They feel more powerful when making someone else feel hurt. They do it to gain more friends than they did before. They find themselves amazing and get all the fame from his mates and others. They also think they are cool when they bully someone. One student said, "Yes, because they don't understand what it's like."

Bullying can cause young people to feel insecure about their weight

One student said, "It's not that easy to be a small size growing up and people should not be called fat because they're not fat. It should all go away when they grow up; it's just puppy fat, as they say." Being called fat and ugly are two main words that are used a lot to offend young people. It can cause them stress and depression which leads to other dangerous subjects. It can cause them to work out too much and hurt themselves.

There is cyber bullying.

Cyber bullying is where people all around the world start bullying people either by their looks or their personality. This can cause depression. Cyber bullying can be done by strangers where they force you into doing things you don't feel comfortable with. A student said 'people sending horrible messages should be banned from the web. And mean messages that offend people should be hashed or not sent.'

Conclusion

In conclusion, bullying is happening all over the world and we did a Q&A for 10 students to answer 6 questions for you to understand the quotes above.
