The dark web was created in the mid 1990s, US military researchers created a technology that allowed intelligence operatives to exchange information completely anonymously.

The US government created the 'Dark Web' in order to share sensitive information free from the public eye. However, they raised public awareness too it so their own messages will separate from the general noise.

Whistle blowers use the dark web in a positive way to attempt to make the authorities aware of corruption. Whistle blowers are people who tell on other people.

The dark web is also used by Terrorists so that they can communicate with each other to share plans and intelligence. The dark web holds a fundraising site to support funds for bombs and ammunition. The currency to fund is bitcoin (an online virtual currency)

People can get Drugs, Weaponry, Pornography, illegal footage of people getting murdered and Explosives from the dark web.

2,000,000 per day use the Dark Web and it takes up to 0.03% of the internet traffic. However, people are being prosecuted for illegal activity per day '19-year-old has been given an eight-year custodial sentence after trying to import explosives from The Dark Web in an attempt to kill his father'.
