*Date: Thursday 15 March 2018*

There is a new bus in town, the Optare Solo SR and it is exceptional when it comes to fuel efficiency. Yeomans Travel, based in Hereford, have got 6 of these super-efficient buses in their fleet and they are popular with their customers, especially me!

I like them because they have comfy seats, ideal for bumpy journeys. They have a cool interior in blue which is calming. Getting on and off is easy unless you are in a wheelchair, when the driver has to physically get out of his cab and put a ramp down. According to a source from Yeoman's, the modern look, low floor access and spaciousness are popular with the public.

Most importantly, it is environmentally friendly. Millbrook, an approved Testing Facility, awarded them a Low Emission Test Certificate, making 15% saving or more compared to standard buses.

If I had a choice as to which bus I would take for a journey, it would be the Optare Solo SR every time!
