

The World's Biggest Scoop

Catherine and Abbie – Thursday 16 March 2017

In Cedarburg, Wisconsin, Kemp's Dairy has set the record for the largest ice cream scoop. The scoop weighed in at 1,365.31kg/ 3,010lb, had the height of 5ft 6" and width of 6ft 2". It approximately contains 733 household containers of ice cream (which is approximately 1.5 quarts) combined into one huge scoop. The strawberry delight could fill an entire football field with its creamy goodness.

Kemp's Dairy assembled this ginormous ice cream with the help of five nationally ranked snow sculptors. It was created to commemorate the 100th anniversary of the long-loved business. Once the ice cream had been crafted it was awarded with the Guinness World Record for the World's Biggest Ice Cream Scoop. The frozen delicacy was consumed at Cedarburg Strawberry Festival by the thousands. Founded in 1914 by William Henry Kemp, Kemp's Dairy has provided families with wholesome and delicious dairy products for generations. They began their journey in a small creamery in South-Eastern Minnesota. To this day they are headquartered in St. Paul, Minnesota; they run six manufacturing facilities in Wisconsin, North Dakota and Minnesota.

Kemp's Dairy only uses the freshest ingredients to give the finest flavours of ice cream. The Old Fashioned Vanilla Bean Ice Cream and the Kemps GooGoo Cluster Ice Cream are only a few of the most beloved ice cream flavours.

Many of their consumers have reviewed their ice cream and say that:

"The ice cream is rich and creamy with a flavour that you can savour".

Kemp's dairy is only being sold in America but we have high hopes that it will one day be sold globally.
